4. **Basket** | Daily AOV/ABS, Orders, Installments
5. **Commercial** | Vouchers, Flash Sales, Visibilities
6. **Store Ranking**
7. **Key Learnings**

OVERVIEW

- For 9.9 2022, the total GMV of three days standing at **17.26M**. The highest record among each mega campaign so far.
- CBMO** was contributed around **42.82%** of total campaign GMV (We already achieved **55%** of the total target during CBMO period).
- Compared with previous mega campaign (LZD BD 2022 and 9.9 2021), the **store visitors** was lower but the **CR%** was way higher than those campaigns; it could be implied that we have **higher quality of traffic**.
- Furthermore, we can acquire more visitors to **PDP**, especially **GC and KA** which help to boost our GMV.
- GC** still be the leading category for the campaign; the contribution was around **50%** of the total GMV.
- Offsite GMV** was contributed higher despite lower in traffic visitors, more than **78.96%** compared to LZD BD 2022, and more than **229.42%** compared to 9.9 2021.

1. GMV

BY DAY

- Breaking down the performance by day, the first day was contributed the highest at **82%**.
- The second day was contributed at **11%**, higher than LZD BD 2022 by **33%** due to the ongoing of **co sub vouchers**, and contribution on **FS of HD9200**.
- For the third day, GMV was slightly decrease due to the discontinue of co sub vouchers, and FS on the last day was not that performed.

1. GMV

D-DAY by hours (September 9)

- ❑ For the first D-Day, we received around **93 slots** of FS (including repeated slots and store FS); LZD slot was 40 slots, while store FS slot was 53 slots; **HD9200** and **GC6815** contributed mostly here.
- ❑ The FS contribution of the first day was at **58% (8.18 M)**. If count only LZD Slot, the contribution will be at **44% (6.23 M)**.
- ❑ Besides FS contribution from HD9200 and GC6815, **PSG9050** was highly contributed by achieving **97 units** sold on the first day.

1. GMV

D-DAY by hours (September 10)

- ❑ For the **2nd day**, we have around **46 slots of FS** (about 50% lower than the first day slots); we could generate around **958K** from FS; contributed around **50%** of overall GMV.
- ❑ **HD9200** had been placed into every FS round these day, leading to the highest contribution for the second day at **14% (263K)**.

1. GMV

D-DAY by hours

(September 11)

- ❑ For the last day of 9.9 2022 campaign, **PSG9050** was dominated in term of GMV driven; contributed at **12%** (**146K**).
- ❑ **AC1215** and **AC0820** had been pushed a lot into last day FS, but the achievement per slot was not that high. We may need to keep pushing the products that received visibility to search in order to receive more of converting opportunity; moreover, we could use **CEM** tool to notice our audiences as well.

1. GMV BY CATEGORY

- ❑ For 9.9 2022, GC was highly dominated in term of category contribution (50%); PSG9050, GC6815, PSG6064, GC628, GC9315 and PSG8160 were the top SKUs contribution for the category.
- ❑ KA was contributed at 32.69%, the main contribution was from HD9200, HD9270 and HR2225; contributed at 67.52% of GMV for KA Category.
- ❑ Compared with LZD BD 2022 and 9.9 2021, all category was dominated those 2 campaigns GMV except Air category that was dropped by 22.61% compared to LZD BD 2022.

1. GMV BY SUB CATEGORY

- From the previous slide, we can see that the decreasing in GMV of Air Cleaners sub category was from **AC1215** and **AC0820/21 BOGO**. If we want to increase the sale of those 2 SKUs further, we may need to increase traffic for the SKUs since the traffic was highly dropped when compared to LZD BD 2022.

1. GMV

ONSITE vs OFFSITE

- ❑ In terms of offsite GMV contribution, the offsite contribution was higher compared to LZD BD 2022 (**12.35% vs 10.72%**).
- ❑ Furthermore, if we compared the exact number of offsite GMV generated, we have increased by **78.96%** from LZD BD 2022.

2. TRAFFIC BY DAY

- For D-Day, our **Store UV**, the number was slightly lower compared to LZD BD 2022 and 9.9 2021; lower by **6.91%** and **11.54%** respectively.
- However, the **PDP UV** was higher compared to previous LZD BD 2022 and 9.9 2021, leading to higher CR% for the campaign.
- During Teasing, we achieved PDP UV over Store UV by **77%**, the ATC% was at **14.18%**; the number was higher than LZD BD teasing period in which ATC% was at **14.05%**, but the rate was lower when compared to 9.9 2021, which we achieved at **16.93%**.
- Nevertheless, the actual **ATC number** was higher than LZD BD 2022 and 9.9 2021, higher than **55%** and **35%** respectively.

2. TRAFFIC

ONSITE vs OFFSITE

- ❑ For **teasing offsite traffic**, the number of **UV** was highly compared to LZD BD 2022 and 9.9 2021, higher than **19%** and **47%** respectively, indicated that we have strengthen our media strategy better and better.
- ❑ **PDPPV** was way higher; higher than **79.51%** compared to LZD BD, and higher than **195%** compared to 9.9 2021.
- ❑ For **D-Day offsite traffic**, even though the UV number was lower compared to previous LZD BD, but the conversion was more higher than 2x; the **D-Days conversion** was at **6.25%**, while LZD BD was at **2.67%**.

2. TRAFFIC

TRAFFIC SOURCES (D-DAYS ONLY)

- ❑ About traffic sources, for overall D-Days, **Others**, **Search** and **Flash Sale** are still our most important traffic channels from LZD guided traffic.
- ❑ Focusing on **Search** and **FS**, there was more **UV** from search compared back to LZD BD 2022 (**10.8K vs 7.7K**), buyers also increased, leading to higher **CR%** (**14.89% vs 10.31%**). The top keywords for search will be Philips, Philips official store, เตาไรต์ ไข่น้ำ Philips, เตาไรต์ ไข่น้ำ etc.
- ❑ For **FS**, we have more FS slots than LZD BD campaign (**76 vs 45**); however, UV was lower but we can convert more buyers, so CR% increased.

2. TRAFFIC

Sponsored Discovery (9.9 2022)

- 9.9 teasing day clicks increased 104.6% as the spending more 45.8% than 6.6 teasing , due to the lower CPC price and the better CTR rate.
- Compared with 6.6 D day , ROI had improved due to the CVR and the number of clicks had increased. We should focus on push the higher CVR products.

3. CONVERSION

BY DAY

- ❑ CR% during D-Days was massive, we could achieved **14.49%** on the first D-Day (higher than the first day of LZD BD CR% by **81%**).
- ❑ **CBMO CR%** was at **30.72%**, even higher than 12.12 CBMO by **21%**.
- ❑ **Quality of traffic** from both onsite and offsite were a crucial component for conversion rate uplifting for this campaign.

4. BASKET

BY DAY

☐ AOV was around 3.2K on average. The first day had higher AOV due to a lot of GC contribution.

4. BASKET

ORDERS BY AOV & INSTALLMENTS

- ❑ Installment contribution was high for 15K – 20K order range; around **22.84%** contribution.
- ❑ Installment payment was increasing compared to LZD BD (**10% vs 4%**) and recent MYS (**10% vs 7%**).
- ❑ So, we should continue on **advertising** the **installment option** in order to receive more orders from high value basket size.

4. BASKET

ORDERS BY REGION

- ❑ Bangkok and Central Region contributed the most as previous; accounted for 64% of total contribution.
- ❑ In order to increase others region contribution, we may need to diversify our target group, and penetrate more upcountry.
- ❑ We could also use **free shipping** as our main communication strategy to reach out the upcountry customers.

5. COMMERCIAL

VOUCHERS

- Vouchers are really important to our GMV driven, since around **95%** of our revenue came from orders with voucher applied.
- Voucher redeemed rate was at **4.56%**, which was higher than LZD BD by **68%** and higher than 9.9 2021 by **22%**.
- 15% co sub voucher, and specific SKUs co sub voucher for PSG9050, EP5447, EP4321 had the highest **redemption rate** among other voucher; insisting that the vouchers were seemed attractive to customers.
- We should continue to do both **co sub voucher by AOV range**, and **specific SKUs co sub voucher** since it could attach customers willingness to buy. Although the cost may slightly increase but we can have more discount than our stand alone vouchers as well.

7. KEY LEARNINGS

SUMMARY

- ❑ For 9.9 2022, we did very well on **CR%**; the highest record among each individual mega campaign. CR% was higher due to the increased number of **PDP visitors**; **7.02%** higher than LZD BD 2022 and **21.06%** higher than 9.9 2021.
- ❑ **Add to cart units** during teasing periods were higher compared to the previous mega campaigns; higher than **55%** compared to LZD BD 2022 and higher than **35%** compared to 9.9 2021. **CR%** from cart was higher when compared to LZD BD 2022 (**31% vs 26%**), and to 9.9 2021 (**31% vs 23%**)
- ❑ **GC** and **KA** were the top leading categories, **CR%** of the category was at **8.22%** and **8.59%** respectively, higher than LZD BD 2022 by **39%** and **75%** consecutively.
- ❑ As a result, our **traffic quality** was higher than the previous campaigns, since we have more number of buyers despite lower store visitors.
- ❑ **Always on CPAS** for GC products should also help on the contribution of GC category; we should also try the always on CPAS for others category also, especially for **Air** Category that we have a huge drop in traffic; lower than LZD BD 2022 by **54.57%**.
- ❑ **Store visitors** was lower due to lower UV on **Others** (LZD asset visibilities) and **Flash Sale** sessions; by having a **package on D-Days** should help to boost the number of visitors to the shop further.
- ❑ **Air category** was the only category that the revenue was dropped behind the previous mega campaign (if compare to LZD BD 2022), **AC1215** was the main reason of the dropping revenue.
- ❑ **Installment payment** contribution keep increasing compared to the previous campaigns, so we should continue on advertising about our installment option.

SUGGESTIONS FOR NEXT CAMPAIGN

- ❑ **Still focusing towards GC:** Since GC is becoming more important to us in term of contribution, and it also could help us on GMV driven (high price point), so we should grasp these opportunity towards GC.
- ❑ **Air category:** According to our dropping revenue and visitors towards Air Category (especially AC1215), we may need to advertise more (maybe trying an always on CPAS like GC category, or find some special mechanics to boost more sales for Air products ex. Bundle, GWP etc.)
- ❑ **Continue with co subsidy vouchers:** Since voucher could help leading the sales, and for specific SKUs co sub voucher also help leading the checkout of high price point products (since we will have a dedicated advertising section as well), so we should continue with the co sub voucher mechanics (both AOV range / Specific SKUs).
- ❑ **Installment option:** Since installment option contribution is increasing, so we need to keep continue of advertising the payment option since we can increase more of our basket size as well. We should put 0% installment icon on the PDP as well in order to receive more awareness from the customers.
- ❑ **Onsite Assets on D-Days:** We already receive massive CR% but the overall traffic was decreasing, so we may need to gain more traffic on D-Days so that we should have higher of sellout chance. Thus, by having more and more of visibility assets during D-Days should help in gaining traffic opportunity.

Thank you!
